

Solve each problem.

1)  $\frac{4}{5} - \frac{1}{6} =$

2)  $\frac{5}{6} + \frac{1}{2} =$

3)  $\frac{5}{6} - \frac{7}{10} =$

4)  $\frac{3}{6} + \frac{2}{5} =$

5)  $\frac{3}{5} - \frac{1}{10} =$

6)  $\frac{6}{10} + \frac{1}{2} =$

7)  $\frac{1}{6} - \frac{1}{9} =$

8)  $\frac{8}{9} + \frac{2}{4} =$

9)  $\frac{1}{2} - \frac{1}{7} =$

10)  $\frac{6}{7} + \frac{1}{2} =$

Solve each problem.

1)  $\frac{4}{5} - \frac{1}{6} = \frac{24}{30} - \frac{5}{30} = \frac{19}{30}$

2)  $\frac{5}{6} + \frac{1}{2} = \frac{10}{12} + \frac{6}{12} = \frac{16}{12}$

3)  $\frac{5}{6} - \frac{7}{10} = \frac{50}{60} - \frac{42}{60} = \frac{8}{60}$

4)  $\frac{3}{6} + \frac{2}{5} = \frac{15}{30} + \frac{12}{30} = \frac{27}{30}$

5)  $\frac{3}{5} - \frac{1}{10} = \frac{30}{50} - \frac{5}{50} = \frac{25}{50}$

6)  $\frac{6}{10} + \frac{1}{2} = \frac{12}{20} + \frac{10}{20} = \frac{22}{20}$

7)  $\frac{1}{6} - \frac{1}{9} = \frac{9}{54} - \frac{6}{54} = \frac{3}{54}$

8)  $\frac{8}{9} + \frac{2}{4} = \frac{32}{36} + \frac{18}{36} = \frac{50}{36}$

9)  $\frac{1}{2} - \frac{1}{7} = \frac{7}{14} - \frac{2}{14} = \frac{5}{14}$

10)  $\frac{6}{7} + \frac{1}{2} = \frac{12}{14} + \frac{7}{14} = \frac{19}{14}$
