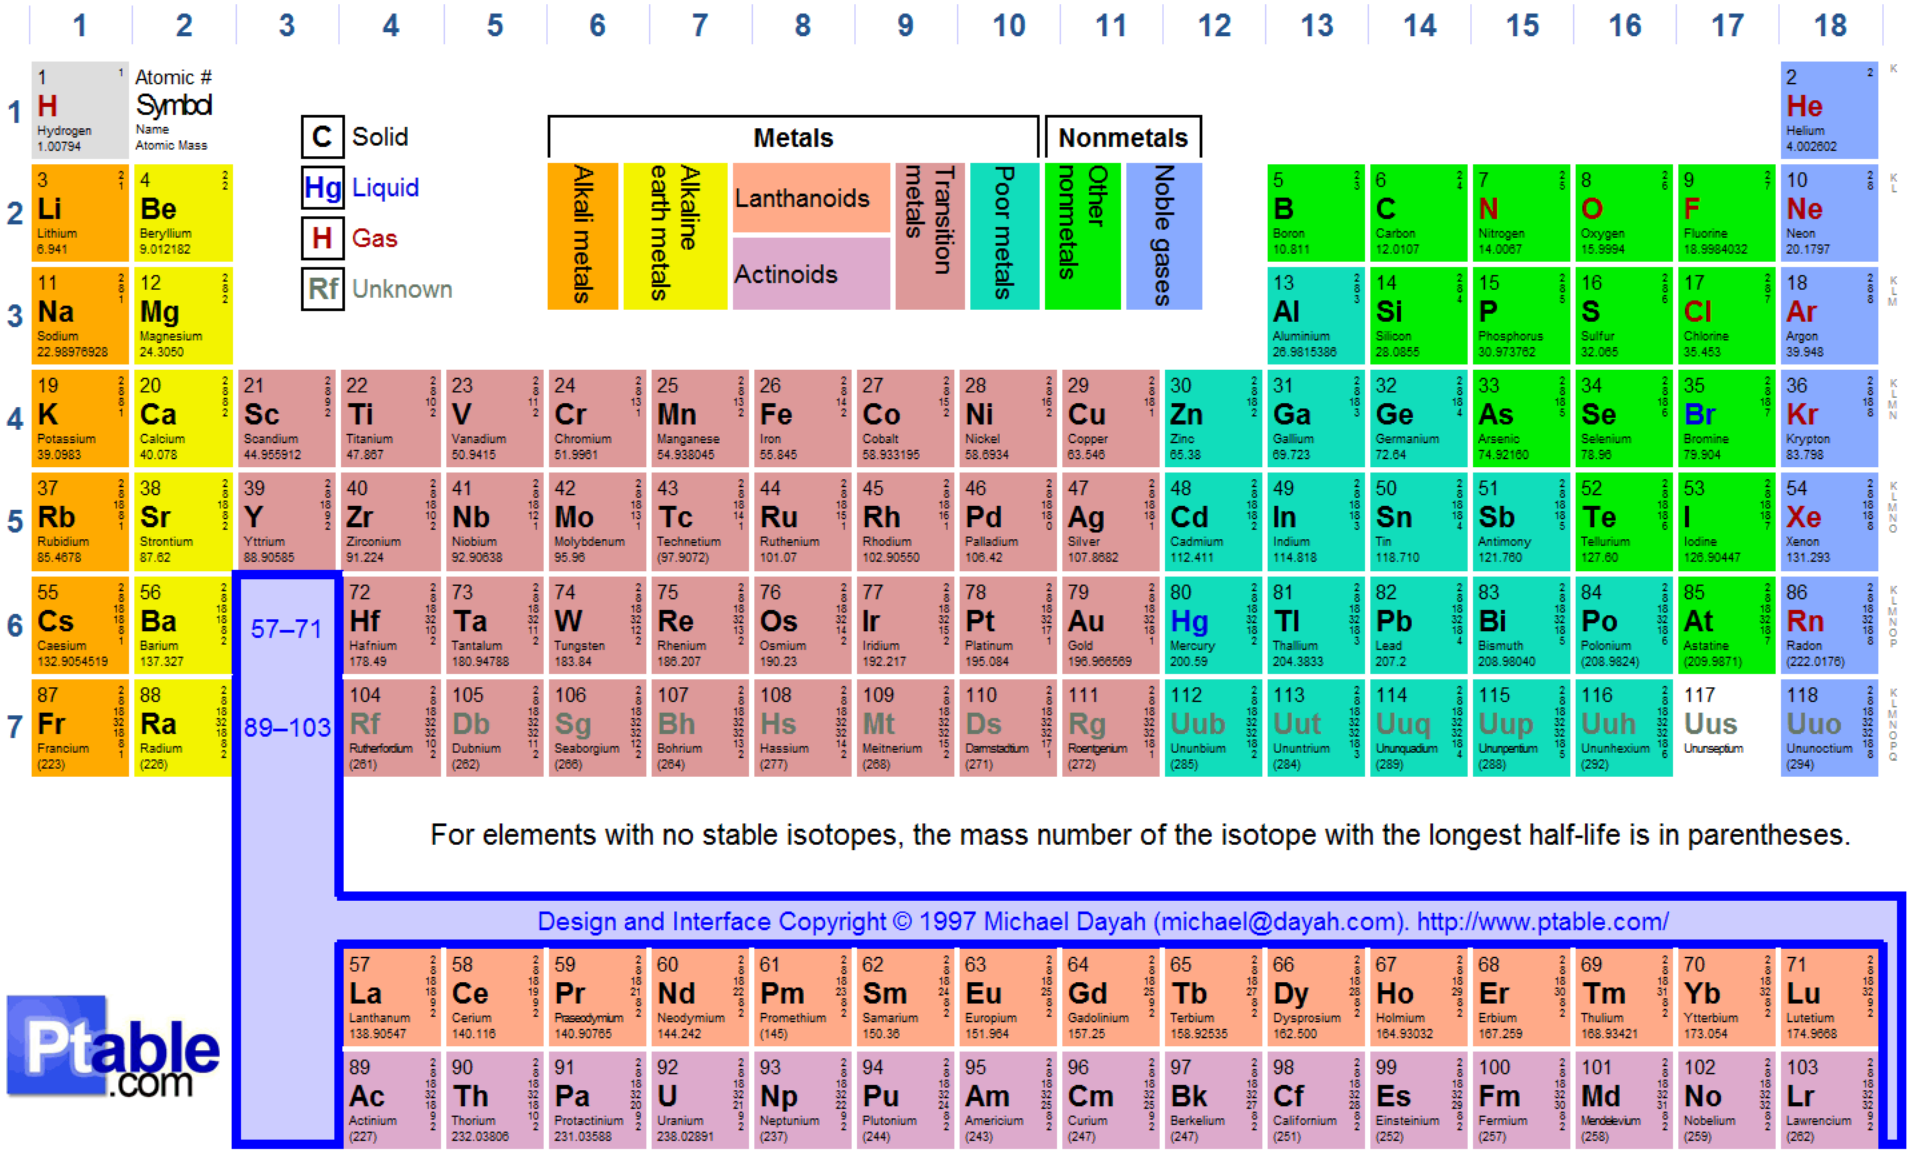
Chemistry 101

What is Chemistry?

- the branch of science that deals with the identification of the substances of which matter is composed;
- the investigation of their properties and the ways in which they interact, combine, and change;
- and the use of these processes to form new substances.

Periodic Table of Elements



An ELEMENT is a pure substance made from a single type of ATOM.

What is an Atom?

- Building blocks for all the rest of the matter in the world
- Neutrons, protons, electrons
- Small!

Who am I?

Atomic Mass

The **atomic mass** (m_a) is the **mass** of an **atomic** particle, sub-**atomic** particle, or molecule. It is commonly expressed in unified **atomic mass** units (u) where by international agreement, 1 unified **atomic mass** unit is defined as 1/12 of the **mass** of a single carbon-12 **atom** (at rest).
